## IN THE CLAIMS

Kindly amend claim 1 as shown in the following claim listing:

- (currently amended) An optical holographic device for reading out a data page of a holographic medium, <u>said data page</u> <u>having a staggered structure of data bits</u>, said holographic device comprising a pixilated detector having detector elements organized in a staggered structure, <u>and said</u> <u>staggered structure of the detection elements matching said</u> <u>staggered structure of data bits</u>.
- (original) An optical holographic device as claimed in claim
  , wherein said structure is a quasi-hexagonal structure.
